

# 333 CV

**333** is collective work of Ivana Plavec, Branka Saric and Lena Gätjens, founded in 2011. Coming from the fields of architecture, stage design and lighting design, since 2013 they have been working together on art on the building / public art projects.

## Artist Statement

Our work in form of site specific installations and objects uses the medium of light to ignite perception by bringing attention to transient and often unnoticed phenomena. We are looking into relations between the public and the individual, macrocosm and microcosm. Through interplay of light, space and material we explore the exchange between one's own perception and the idea of a collective reality.
