

333 is collective work of Ivana Plavec, Branka Saric and Lena Gätjens, founded in 2011 around the topic of light.

ARTIST STATEMENT

Our work in form of site specific installations and objects uses the medium of light to ignite perception by bringing attention to transient and often unnoticed phenomena. We are looking into relations between the public and the individual, macrocosm and microcosm. Through interplay of light, space and material we explore the exchange between one's own perception and the idea of a collective reality.
